DOES YOUR EXISTING SCOREBOARD JUST KEEP SCORE?

The DCI Video Scoreboard is designed for maximum versatility. Featuring high-resolution LED screens much like the 'Jumbo-Trons' seen in large scale sports venues, it is capable of delivering much more than just sports scores to your audience. From color schemes to specific school logos, many aspects of the Video Scoreboard's looks are completely customizable. Alternate scoreboard programs can easily be installed so the same Video Scoreboard can serve multiple needs such as basketball, wrestling or volleyball - just to name a few. Full-motion video can also be incorporated for replaying that buzzer-beating shot or advertising content.

VOLLEYBALL

Shown with optional top and bottom valance and custom graphics.

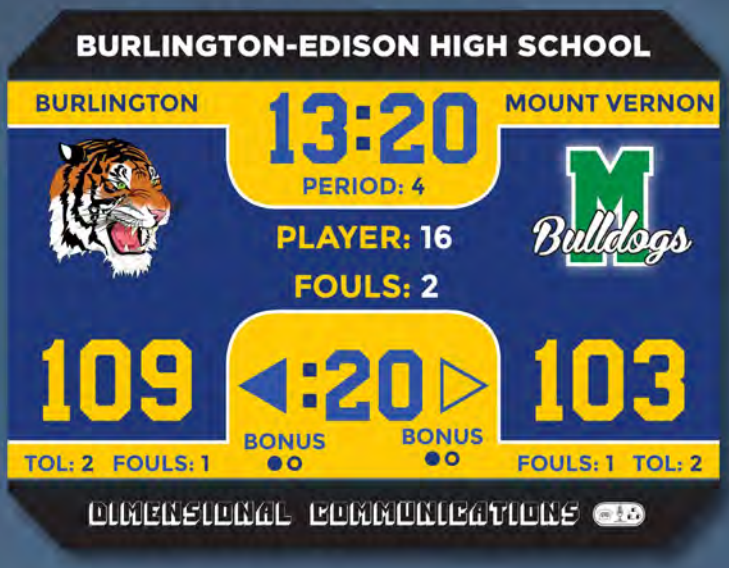

AN EDUCATIONAL EXPERIENCE

The Video Scoreboard can be used as a great teaching tool within a school's curriculum. It comes equipped with an audio/video mixer, opening the door for an entry level video production learning experience.

Other areas for education opportunity:

- Information Technology
- Computer Science/Programming
- Graphic Design
- Audio/Video Production

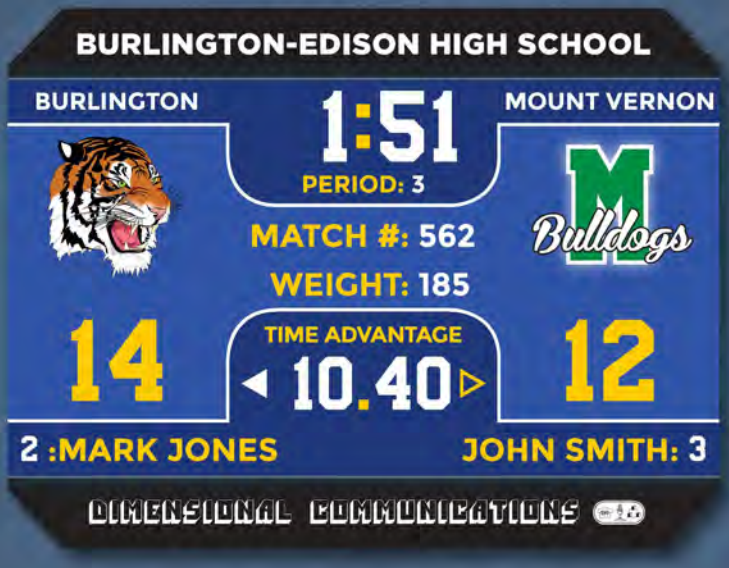

BASKETBALL

WITH DCI'S VIDEO SCOREBOARD THE POSSIBILITIES ARE ENDLESS:

- Show recorded replays during game breaks
- Earn revenue through community advertisements
- Display custom visual effects
- Provide custom messages and information during events
- Quickly display videos and images
- Designed to function in fully lit rooms or gymnasiums
- Modular construction for custom sizing

WRESTLING

Wireless touch screen remote

Courtside Control Console

TOTAL CONTROL

Customized control configurations are available to meet your specific needs. The standard package's portable control console is designed to be rolled out of storage at game time, plugged into the house sound system and controlled from courtside. Video inputs include the scoreboard computer, DVD player, digital file player and optional hand-held camera. The scoreboard is run by a standard computer keyboard and multiple 10.1" wireless touch-screen tablets to maintain simplicity and ease-of-use.

Front-side servicable LED modules.

SCALABILITY

Because the LED displays are built from individual modules, the display can be scaled up for larger venues or to whatever size the budget will allow. Our standard Video Scoreboard package includes two 110" diagonally measured displays; however the number and size of the displays are optional.

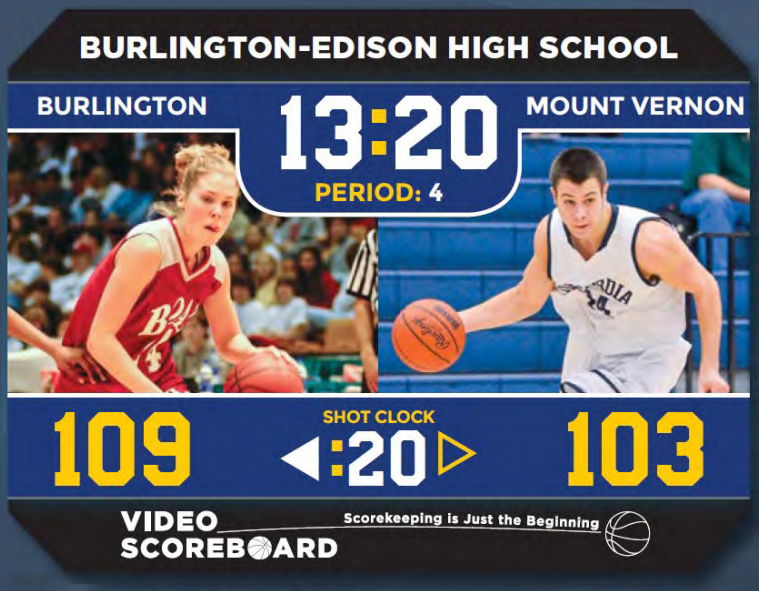

MAINTENANCE

On site service is another feature of the Video Scoreboard. If an object were ever to strike the surface of the display causing damage, only the damaged module would need repair or replacement. The unique front-service modules are easily and quickly replaced.

MODERN DESIGN

The Video Scoreboard platform is built on standard PC based programming. This means that as your school moves further into the 21st century, so can the look of your scoreboard. The possibilities are endless and will give your gymnasium a modern look for the enjoyment of your fans, student body, boosters and advertisers.

REVENUE GENERATION

The Video Scoreboard can be used to produce a revenue stream for the school that could eventually pay for the original investment. Photos or videos from local businesses can be displayed at times when the scoreboard's scorekeeping function is not in use. Sponsors exist around the local community as well as national brands that would be willing to pay to get their message to the student body, the faculty and their families.

FULL-MOTION VIDEO

Unlike most conventional scoreboards, the Video Scoreboard is capable of rendering full-motion video. This provides the capability of instantly transitioning from the game scoreboard to an advertisement, an interview with the coach, a live-action replay (with the use of the optional hand-held camera) or pep rally video.
